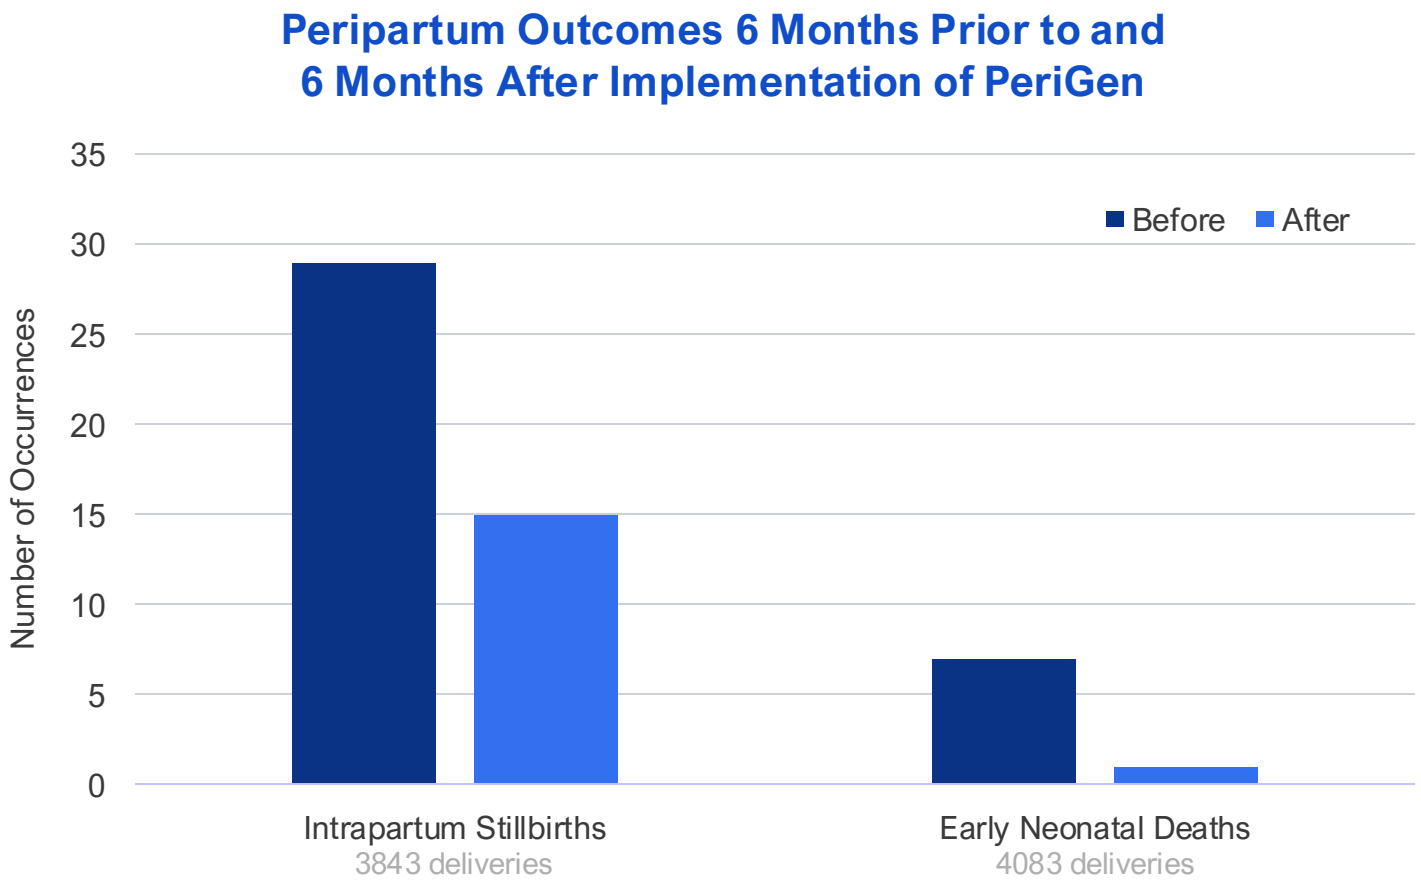
The Global Impact of Early Warning Systems



KEY TAKEAWAY

The Area 25 Health Centre — a low-resource maternity hospital in Lilongwe, Malawi — saw an 82% reduction in stillbirth and early neonatal death rates in the first six months after implementing Vigilance.[1]

1. Chiweza C, Iwuh I, Hasan A,Malata A, Belfort M, Wilkinson J. Can artificial intelligence-augmented fetal monitoring prevent intrapartum stillbirth and neonatal death in a low-income setting: An observational study? BJOG. 2022;00:1–3. https://doi.org/10.1111/1471-0528.17321
